EXPERIENCE

Graviti Pharmaceuticals

Software Engineer II

Dec 2024 – Present · Hyderabad

Nucleus — Pharmaceutical Manufacturing Execution System (MES)

- Built the Equipment Planner module for a pharmaceutical Manufacturing Execution System (MES) with draft/publish versioning, bulk operations, and planned-vs-actual production reconciliation.; implemented activity logbooks for RMG, FBD, Blender, and Coating machines.
- Optimized high-traffic APIs (Dispensing, MRR, MRN, Stock Card) by resolving N+1 queries, adding targeted indexes, and tuning Sequelize includes; integrated Redis caching achieving measurable response-time reductions.
- Designed and implemented a real-time internal messaging platform using WebSockets and RabbitMQ for reliable asynchronous communication across distributed services.
- Built centralized audit logging via Sequelize Global Hooks with trace ID propagation for end-to-end request traceability.
- Contributed to a production codebase spanning 144+ API endpoints and 300+ database models.

Node.js Express.js PostgreSQL Sequelize ORM Redis RabbitMQ WebSockets
REST APIs AWS S3

PDF Search Engine (Retrieval-Augmented Generation)

- Developed a full-stack RAG system enabling semantic search and contextual Q&A over PDF knowledge bases using Node.js and React.js.
- Integrated Weaviate vector database for embedding storage and high-accuracy semantic retrieval.
- Implemented fallback handling for no-context queries preventing hallucinated LLM responses.

Node.js React.js Weaviate OpenAI APIs RAG Embeddings

Electronic Health Records (EHR) System

- Built a scalable EHR platform using Java, Spring Boot, Hibernate, PostgreSQL, React.js, and AWS supporting clinical data workflows.
- Developed user and patient management modules handling 10,000+ patient profiles.
- Implemented clinical features: Vital Signs, Progress Notes, and Clinical Summaries via REST APIs.
- Integrated AI-powered pre-rounding summaries using LLM APIs reducing doctor preparation time by 50%.

Java Spring Boot Hibernate PostgreSQL React.js AWS REST APIs

AqueraLabs

Member of Technical Staff II

Jan 2023 – Dec 2024 · Bengaluru

- Developed IAM connectors using Node.js and Express.js integrating Okta and enterprise HR systems.
- Designed REST APIs following async and event-driven patterns; implemented Webhooks for real-time event propagation.
- Reduced Home Base Home Care connector latency from ~30s to 5–6s (80%+ improvement).
- Implemented SCIM 2.0 compliant connectors with full CRUD for users, groups, roles, and entitlements.
- Built file-processing connectors supporting XLS, CSV, and ZIP formats.

Node.js Express.js REST APIs Webhooks SCIM 2.0 Okta MongoDB

The 10X

Full Stack Developer Intern

May 2022 – Dec 2022 · Remote

- Built a MERN-based contact management application with CSV import and search functionality.
- Developed REST APIs using Node.js and Express.js; tested endpoints using Postman.

MongoDB Express.js React.js Node.js REST APIs Postman

SUMMARY

Full Stack Software Engineer with 3+ years of experience building production-grade MERN stack applications, distributed backend systems, and real-time platforms. Proven expertise across the full delivery lifecycle — from REST API design and database modeling to React frontend, cloud infrastructure (AWS, Azure), and async messaging (RabbitMQ, Redis). Experience shipping features that serve enterprise users at scale with measurable performance and engagement impact.

SKILLS

Backend	Node.js, Express.js, Java, Spring Boot, Hibernate, JPA, REST APIs, WebSockets, Webhooks, Microservices
Frontend	React.js, JavaScript, TypeScript, HTML, CSS
Databases	PostgreSQL, MongoDB, Weaviate (Vector DB), DynamoDB, Sequelize ORM, Prisma ORM
Cloud	AWS (EC2, S3, Lambda), Docker, CI/CD
Messaging	Redis, Kafka, RabbitMQ
Tools	Git, GitHub, Jest, Postman, Swagger/OpenAPI, Jira, Zoom SDK
AI	RAG, OpenAI APIs, Embeddings, LLMs

EDUCATION

Nalanda Institute of Engineering & Technology

Bachelor of Technology 2018–2021
Guntur, Andhra Pradesh Government

Polytechnic College

Diploma in Engineering 2015–2018
Proddatur, Andhra Pradesh

ACHIEVEMENTS

- Qualified GATE 2021 & 2022

LANGUAGES

- Telugu (Native)
- English (Advanced)
- Hindi (Conversational)
